## Workshop description

The Leibniz-supported project on Reinventing Europe marks the 50th Anniversary of the Treaty of Rome and seeks to discuss a future direction for European integration. This workshop will focus on the global context for this process, and specifically global environmental issues. How will global environmental considerations shape European processes? How should Europe approach global negotiations? How will trade and other policies be affected by environmental considerations? What should the design objectives be for a European process? Coverage will extend to carbon emissions eco trade, energy trade, trade with lax standard countries, and other topics.

All papers presented at the workshop are eligible for submission to the CESifo Working Paper Series.
