Self-Financing Constraints and Average Cost Pricing

A Critique of the Underprovision Hypothesis

Residence Taxes

Dividend Taxes and Equity Traps

Existence Problems

Policy Implications

Appendix to Chapter 2 Criticism of the Zodrow and Mieszkowski Infrastructure Model

Chapter 3 The Erosion of the Welfare State

Globalization and the Welfare State

Income Redistribution and Selection Principle: An Insurance Theoretic Interpretation

Redistribution as an Allocative State Responsibility: A Simple Model

The End of the Welfare State in Tax Competition

Policy Implications

Appendix to Chapter 3 The Non-existence of a Market for Wage Insurance

Chapter 4 Social Dumping in the Transformation Process?

The Accusation of Social Dumping

Redistribution vs. Wages in Kind

Why are the Differences in Direct and Indirect Wage Costs so High?

A Simple Model of the Economic Catching-Up Process

The Policy of the National Government

The Overall Welfare Optimum

The Properties of the Catching-Up Process

Lessons from German Unification

Why Low Wages and Social Standards Do Not Indicate Social Dumping

Chapter 5 Ecological Competition

Ecological Dumping or Excessively Green Policies?

Conditions for a Functioning Ecological Competition
Ecological Dumping with International Spillover Effects
Pollution Certificates, Foreign Direct Investment, and the Rent Dissipation Effect
Environmental Standards
The Environmental Policy Externalities: A Suggested Interpretation
Policy Implications

Chapter 6 The Competition of Product Standards

Cassis de Dijon and Deregulation Competition
The Lemons Problem
Simple Model of Private Quality Competition
An Allocative Explanation of the State Regulation of Quality
The Competition of Laxity
Policy Implications

Appendix to Chapter 6 The Properties of the EE Curve in Figure 6.1

Chapter 7 Limited Liability, Risk Taking and the Competition of Bank Regulators

Banking Risks
Lemon Bonds
A Note on the Literature on Limited Liability and Risk Taking
Banking with Unlimited Liability: The Basic Model
Lemon Banking and the BLOOS Rule
Welfare Implications and Optimal Regulation
The Competition of Banking Regulation
The Basel Committee and EU on the Right Track

Chapter 8 The Competition of Competition Rules

A Tottering Creed

Regulating the Monopoly

The Advantage of Forming a Common Market

The Ordo Liberal Equilibrium in Systems Competition

Ordo Liberal Policy vs. First-Mover Advantages

The Deregulation Race

An Uncomfortable Proposition

Reconsideration of Regulation Policy
