In order to identify individuals uniquely it is possible to combine 1.3) id, 1.5) country, 1.6) ig, 1.8) noq_2 (or 1.7) noq_1 if not available). Due to ist construction this combination might vary for an individual over time, but any combination is not shared by multiple individuals

Against a background of growing protectionism in many parts of the world, ICC has recently issued its **2012 Guidelines for International Investment** to encourage a more secure environment for cross-border investment.

Do you think that the business community should be urging governments to work towards a **multilateral agreement** to provide a **framework of enforceable global rules** for international investment?

WES special question

These five diagrams show market income (before taxes and transfers) distributions of different types of societies. Please read the descriptions and look at the diagrams and decide which you think best describes your country.

Type 1 [1]	Type 2 [2]	Type 3 [3]	Type 4 [4]	Type 5 [5]
A small elite at the top, very few people in the middle and the great mass of people at the bottom.	A society like a pyramid with a small elite at the top, more people in the middle, and most at the bottom.	A pyramid except that just a few people are at the bottom.	A society with most people in the middle.	Many people near the top, and only few near the bottom.
